Supporting Positive Behavior in Children and Teens with Down Syndrome:
The Respond but Don’t React Method
David Stein, Psy.D.

A child doesn’t want to leave the toy store, so he stops and flops. Another bolts across a busy parking lot, turns, and smiles at his mom. An eighteen-year-old student bursts into tears when asked to change activities at school. Sound familiar?

These and other common behavior issues in children with Down syndrome can quickly become engrained and may even persist into adulthood. No parent wants that to happen, and thankfully, help is available! This new book examines how the brain of a person with Down syndrome works, how those differences impact behavior, and why bad behavior should not be viewed as a willful act. It shows parents how to maintain their loving relationship with their child, as they shape and manage behavior using these guiding principles:

- Be proactive, not reactive
- Be consistent
- Use positive reinforcement
- Use visual schedules & Social Stories
- Develop a token reward chart
- Keep gut reactions in check
- Teach siblings to ignore bad behavior
- Learn effective disciplinary techniques

About the Author: David Stein is a pediatric psychologist and founder of New England Neurodevelopment, LLC, in Concord, MA. He speaks widely regarding neurodevelopment and related disorders.

“[A] compassionate and joyful book delineating a practical approach….”

Teenagers with ADD, ADHD & Executive Function Deficits
A Guide for Parents and Professionals
Chris A. Zeigler Dendy

The award-winning, best-selling guide for parents and professionals to understanding and helping teens with attention deficit disorders is now available in a third edition. This is the one-stop source of up-to-date, scientifically accurate, and reassuring information written by expert Chris Dendy. Her book looks at key areas—academics, dating, driving, socializing, and greater independence—that make adolescence potentially more difficult for kids with ADD, ADHD, or Executive Function Deficits (EFD). The third edition includes new and expanded information on diagnosis criteria, research, education strategies and laws, technology use, and more.

Follow the author’s recommended combination approach to treatment which includes using medications, behavior and academic interventions and accommodations, ADHD education, and exercise. And learn about the role of executive function problems and how they relate to teenagers’ difficulties with organizational skills, long-range planning, and staying on task. Armed with the book’s comprehensive facts and strategies, parents, educators, and therapists can be proactive, working together with teens to build resilience and a hopeful future.

About the Author: Chris A. Zeigler Dendy is a former educator, school psychologist, and children’s mental health professional. She has served on the National CHADD Board of Directors, and was inducted into their Hall of Fame. An author and a popular speaker, she is also the mother of grown children with ADHD.

Whole Child Reading
A Quick-Start Guide to Teaching Students with Down Syndrome and Other Developmental Delays
Natalie Hale

Discover the keys to teaching children and adults with Down syndrome and other developmental disabilities how to read for meaning. Written for today’s busy parents and teachers, this easy-to-use guide explains how to “go in through the heart” to hook beginning and struggling readers with high-interest, individualized materials—flashcards, personal books, and modified trade books. The simple strategies described are designed to “teach to the brain” and are based on research about how we learn most easily and naturally.

The methods in the book can be adapted for learners of any age who are reading at a third grade level or below. The crux of the instructional method is to teach the child to sight read for content before focusing on phonetics. Strategies include quick repetition of vocabulary flash cards, and maintaining motivation by alternating high-interest activities with low-interest ones. If you have at least five minutes a day to spend on reading, you have enough time to get started using Whole Child Reading!

About the Author: Natalie Hale is the mother of an adult son with Down syndrome. She speaks widely on the topic of teaching reading to learners with Down syndrome and founded Special Reads for Special Needs in 2000. She is the author of Down Syndrome Parenting 101 (Woodbine House, 2011)

“[T]ruly the best thing I, as a special education teacher, have read in a very long time.” —Cathy Hanson, special education teacher in Oklahoma

Teaching Math to People with Down Syndrome and Other Hands-on Learners Strategies and Materials
DeAnna Horstmeier, Ph.D.

Children and adults with Down syndrome need math for the real world—counting with meaning, adding the scores in a game, and tracking time in order to keep to a schedule. Written in a straightforward and user-friendly style, the second edition of Teaching Math to People with Down Syndrome provides strategies and concrete activities that are relevant to daily living, offer hands-on practice, and provide opportunity for successful completion. It covers:

- Prenumber Concepts
- Counting
- Recognition & Writing of Numbers
- Time & Measurement
- Addition, Subtraction, Multiplication & Division
- Fractions
- Money
- Calculator Use

The appendices are chockfull of over 150 activities—worksheets, games, and teaching aids! Use the book to tailor lessons to students’ needs, incorporate goals into IEPs, and help students access the general education curriculum.

About the Author: DeAnna Horstmeier is a retired educator, former instructor of special education and speech, language, and communication at the Ohio State University, author of books and professional publications on math and reading, and mother of an adult son with Down syndrome.

“An ideal classroom curriculum text….” —The Midwest Book Review’s Library Bookwatch

Gifts
Mothers Reflect on How Children with Down Syndrome Enrich Their Lives
Edited by Kathryn Lynard

*Gifts* is the much-loved collection of over sixty essays written by mothers who share their truths about raising children with Down syndrome. This commemorative 10th anniversary edition includes 10 new personal stories, along with “where are they now” updates on many of the children and families featured in the first edition.

The contributors to this collection have diverse personalities and perspectives, and draw from a wide spectrum of ethnicity, world views, and religious beliefs. These women have a message to share with other mothers, genetic counselors, obstetricians, and the rest of us—that a life with an extra chromosome is one worth living. In particular, *Gifts, 10th Anniversary Edition*, provides new parents with a source of up-to-date, positive, and realistic insight that is too often missing when they are facing a pre- or postnatal diagnosis of Down syndrome.

About the Editor: Kathryn Lynard is a writer, advocate, consultant, and mother of seven living in Salt Lake City, Utah. She is also the editor of *Gifts 2: How People with Down Syndrome Enrich the World*, as well as two anthologies about motherhood, and the author of *The Year My Son and I Were Born: A Story of Down Syndrome, Motherhood, and Self-Discovery* (Globe Pequot Press, 2007).

“Gifts is a treasure in our community, one which we share with our families. It has touched the lives of new and expectant parents, medical professionals, and beyond.”
—Sarah Cullen, Family Support Director, Massachusetts Down Syndrome Congress, Burlington, MA

2016 / Paperback / 6” x 9” / 350 Pages / 70 Photos

My Heart Can’t Even Believe It
A Story of Science, Love, and Down Syndrome
Amy Silverman

All parent stories about raising a child with Down syndrome are special and unique, but in the hands of a good writer, they have the power to resonate beyond family and friends. And that is the case with *My Heart Can’t Even Believe It*, by journalist Amy Silverman.

Amy bravely looks at her life, before and after her daughter Sophie was born, and reflects on her transformation from “a spoiled, self-centered brat,”—who used words like “retard” and switched lines at the Safeway to avoid a bagger with special needs—into the mother of a kid with Down syndrome and all that her new identity entails. She describes her evolution as gradual—one built by processing her fears and facing questions both big and small about Sophie, Down syndrome, and her place in the world.

Funny, touching, and honest, this wonderful book looks at a daughter and her power to change minds and fill hearts with love so deep that, as Sophie once remarked to her mom, “I love you so much my heart can’t even believe it!”

About the Author: Amy Silverman is Managing Editor at *Phoenix New Times*. She is also a commentator for KJZZ, the National Public Radio affiliate in Phoenix, and her work has appeared on the radio show *This American Life* and in the *New York Times*. She lives in Tempe, Arizona, with her husband and daughters. Find her online at www.myheartcantevenbelieveit.com

“[E]ntertaining and educational.”

Going Solo While Raising Children with Disabilities
Laura E. Marshak, Ph.D.

If you’re raising a child with disabilities on your own—solo parenting—whether by choice or circumstance, you’ll find a wealth of support, affirmation, and practical ideas in this guide to living well. Interviews, survey results, and insightful personal narratives of solo moms and dads (and grandparents, too) are woven together with the author’s reliable coping strategies.

“It’s like a support group and a how-to all in one.” —Terri Mauro, About.com Parenting Special Needs

2015 / Paperback / 6” x 9” / 374 pages

$24.95

Getting from Me to We: How to Help Young Children Fit In and Make Friends
Shonna L. Tuck, M.A., SLP

Many children ages seven and under who struggle with social skills often find themselves on the sidelines, in time-out, and otherwise socially isolated from their peers. Recognize the root causes of these issues and help children build the foundational skills necessary to form connections and friendships. A useful book for both parents and professionals that offers effective, targeted activities that encourage joint attention, eye contact, and social interaction.

2015 / Paperback / 6” x 9” / 240 pages

$24.95
**Solve Common Teaching Challenges in Children with Autism: 8 Essential Strategies for Professionals & Parents**  
Edited by Lara Delmolino, Ph.D., BCBA-D

Turn to this guide when your student with autism fails to learn, learns the wrong thing, develops an aversion to instruction, or develops behavior problems. This handy guide, written by behavior and education experts, explores 8 common teaching challenges, the variables that contribute to them, and their corresponding ABA-based solutions.

“These guidelines represent best practice in the field. An invaluable resource for both educators and parents.”
—Rebecca MacDonald, Ph.D., BCBA-D, Senior Program Director – Psychologist, New England Center for Children, Inc.

2015 / Paperback / 5½” x 8½” / 166 pages

---

**Functional Behavior Assessment for People with Autism: Making Sense of Seemingly Senseless Behavior**  
Beth A. Glasberg, Ph.D., BCBA-D & Robert H. LaRue, Ph.D., BCBA-D

Experts on autism and behavior show how to use functional behavior assessment (FBA) to address challenging behavior in people with autism. This new edition describes how to conduct FBAs in settings outside of the clinic—at school, at home, and in the community.

“Recommended reading for all parents, teachers, and caregivers, as every child could benefit from the principles in this book.”—Library Journal

2015 / Paperback / 5½” x 8½” / 172 pages

---

Terry Katz, Ph.D. & Beth Malow, M.D., M.S.

Pinpoint and solve the problems underlying sleep difficulties of kids with ASDs and improve your entire family’s quality of life with the effective interventions found in this easy-to-understand and empathetic guide to good sleep.

“Chapters are well organized and give a concise explanation of the problems that children have falling asleep. Parents do not need to read the entire book, but can easily skip to the part that is pertinent to their situation.”—CAPHIS Consumer Connections

2014 / Paperback / 6” x 9” / 148 pages / Sleep Surveys

---

**Activity Schedules for Children with Autism: Teaching Independent Behavior**  
Lynn E. McClannahan, Ph.D. & Patricia J. Krantz, Ph.D.

The second edition of this popular guide to increasing independence presents activity schedules—a set of sequenced pictures—to help children and adults be more purposeful and self-directed in their daily lives. Covers use of iPads & smartphones.

“*Essential for any family with an autistic child.”
—Library Journal (*starred review)

2010 / Paperback / 5½” x 8½” / 148 pages
A Picture’s Worth: PECS and Other Visual Communication Strategies in Autism
Andy Bondy, Ph.D. & Lori Frost, M.S., CCC-SLP
Help children and adults with delayed or no speech express their needs. Provides an overview of the Picture Exchange Communication System (PECS) and other augmentative and alternative communication strategies, and includes a complete set of introductory PECS lessons.
“The writing is clear and concise and even humorous and touching at times. Highly recommended.” —Library Journal Xpress Reviews
2011 / Paperback / 5½" x 8½" / 146 pages

Essential First Steps for Parents of Children with Autism: Helping the Littlest Learners
Lara Delmolino, Ph.D., BCBA-D & Sandra L. Harris, Ph.D.
Experienced clinicians explain to parents the pivotal steps they can take now to optimize learning and functioning for children—birth to 5—with diagnosed or suspected autism. The book covers early indicators of autism, research about effective treatments, and strategies to boost play, communication, and self-help skills.
“*This is the manual that parents have been asking for. Highly recommended.” —Library Journal (*starred review)
2013 / Paperback / 5¼" x 8¼" / 154 pages / Photos

Visual Supports for People with Autism: A Guide for Parents and Professionals
Marlene J. Cohen, Ed.D., BCBA & Peter F. Gerhardt, Ed.D.
The new edition of this popular book covers a mix of low- and high-tech visual supports—activity schedules, charts, tablets, computers, and smartphones—and ideas for using them to teach academic, daily living, and self-help skills.
“[T]his easy-to-read guide is an invaluable resource in developing critical life skills for people with autism.”
—Rita Shreffler, Autism mom and Executive Editor, Autism File magazine
2016 / Paperback / 8½" x 11" / 214 pages / Color Photo Insert

Andy and His Yellow Frisbee
Written and Illustrated by Mary Thompson
Andy has autism and a fascination with objects in motion. His sister watches and worries as a new classmate approaches Andy on the playground. This hopeful story provides background on autism and a sibling perspective.
“A valuable resource for every elementary school library.”
—Sandra H. Kownacki, Past President, Autism Society of America
1996 / Hardcover / 7" x 10" / 20 pages / Color illustrations / Ages 4–10
Teaching Teens with ADD, ADHD & Executive Function Deficits: A Quick Reference Guide for Teachers and Parents
Chris A. Zeigler Dendy, M.S.

This is the updated edition of the classic guide to educating teens with ADD & ADHD. It includes 80+ summaries on research, teaching strategies, education law, executive functioning, social skills, and meds for time-crunched teachers.

“This book should be in the backpack of every parent and teacher who is involved with children, teens, or young adults with ADHD.”
